

## **Diver's Dive Log Book Maintenance**

For some, this is a real chore, updating their diver's log book after every dive. How many divers do we know, who after getting a dive computer, stopped recording their dive log book. Until one day, when these divers are going for a course and a check is required of their dive log book. They then face double troubles of having to studying the course materials as well as trying to record all their previous dives.

Here's where we come in, when you first join us, we'll record all your previous dives. We will then continue to update your diver's log book for the dives or dive packages that you book through DIVEPAL(S) DiverAssist. Thus, when you need to go for the next course, all you have to do, is study for the course. Your dive record has already been done up! No need to panic and rush after your dive operator's, instructor's signature.

For dive packages that are not booked through DIVEPAL(S) DiverAssist, a small administrative fee will be charged for updating the dive log.

For members who give up their membership but return in the future, a small administrative will be charged for updating the dive log.
